

Market Entry Strategy - B2B SaaS India

Target roles: Strategy Analyst / Associate Consultant / Market Research Analyst

Executive summary

This project demonstrates an interview-ready analyst workflow for Strategy Analyst / Associate Consultant / Market Research Analyst roles. It converts a business problem into a structured dataset, KPI model, Excel dashboard, visual analysis, and decision memo. The work is designed to show practical capability in market sizing, TAM SAM SOM, competitor benchmarking, GTM strategy, pricing.

Business problem

A global B2B SaaS company wants to enter India but needs a prioritized segment, TAM/SAM/SOM model, competitor view, pricing hypothesis, and 100-day go-to-market roadmap.

Dataset and model built

Data components: Segment sizing, Competitor benchmark, Channel economics, Regulatory/compliance notes.

Core KPIs: TAM, SAM, SOM, CAC, Payback, Win-rate.

Segment	TAM_USD_M	SAM_USD_M	SOM_USD_M	Competition	CAC_USD
BFSI Mid-Market	1148	413	71	85	1704
HealthTech	828	265	42	74	1880
EdTech	837	371	45	54	751
Manufacturing	526	181	31	72	1853
Retail	1104	421	74	78	1918

Executive Scorecard - Market Entry Strategy - B2B SaaS India

Segment	CAC_USD	Payback_Months	Priority_Score
BFSI Mid-Market	1704	3.2	16.4
HealthTech	1880	8.6	7.8
EdTech	751	3.6	24.0
Manufacturing	1853	6.9	11.7
Retail	1918	4.5	15.3

Analysis approach

- Defined the business question and success metrics.
- Created a structured data model with KPIs and decision fields.
- Built Excel workbook with dashboard, data table, assumptions, and recommendations.
- Created charts and scorecards for visual storytelling.
- Converted findings into a concise executive recommendation.

Key insights

- Highest-ranked item: EdTech based on Priority_Score = 24.0.
- Second-ranked item: BFSI Mid-Market with Priority_Score = 16.4.
- The dashboard separates performance indicators from decision indicators, making it easier to convert analysis into action.
- The workbook is designed so assumptions and data can be replaced with real company data during a case interview or take-home assignment.

Recommendations

- Prioritize mid-market BFSI and health-tech where compliance pain is high.
- Use partner-led acquisition in Tier-1 cities for first 100 days.
- Launch 3 pricing tiers and measure conversion, CAC, and payback monthly.

Interview talking points

- I built the model from the problem statement and defined metrics before analysis.
- I separated raw data, assumptions, dashboard, and recommendations to make the work audit-friendly.
- I used portfolio projects to show enterprise-style thinking without claiming false work experience.
- I can adapt the workbook to a live case or company dataset quickly.

ATS keywords covered

market sizing, TAM SAM SOM, competitor benchmarking, GTM strategy, pricing, business case, 100-day roadmap
